

GOVERNANCE GREATNESS

Let Rebecca Sutherns help you get the most – and the best – from your board. Choose one of three options to help raise your board’s performance, or save by ordering a combination of services best suited to your needs.

Board Onboarding

Get everyone on the same page and contributing their strengths to the board. This half-day customized workshop provides orientation for new Directors, develops a shared understanding of an effective board member’s role within the context of your organization, and sets a unified direction for the whole board for the upcoming year.

Your Board’s Best Year Yet

Develop a clear annual work plan for your board during this half-day customized workshop. Boards ensure their organization has a strategic plan in place, but too often that plan does not include a detailed way forward for the board itself. This session ensures your board has clear goals and meaningful performance indicators for the year ahead so that it will be in great shape to celebrate its successes a year from now.

Customized Coaching for EDs and Board Chairs

A strong relationship between the Executive Director and Board Chair is critical for an organization to thrive. Leverage its full potential through a 12-hour coaching package, in person or digitally, that helps your key leaders stay well-aligned and productive throughout the year.

About Sage Solutions
